

The map displays the city of Chicago, divided into numerous neighborhood districts, each color-coded. Two specific areas are highlighted with circular callouts and leader lines:

- BUCKTOWN:** Located in the north-central part of the city. The callout shows the **Webster Bridge** crossing the **Webster St.** from **Ashland** to **Dominick**.
- WEST LOOP:** Located in the west-central part of the city. The callout shows the **Harrison St. Viaduct** crossing the **Harrison St.** from **Jackson** to **Taylor**.

The map also includes labels for major streets (e.g., North Ave, Division St, Chicago Ave, Harrison St, Roosevelt Rd, 16th St, 26th St, 31st St, 35th St, Pershing Rd, 43rd St, 47th St, 51st St, 55th ABOUT THIS REPORT

What is TIF? Tax Increment Financing, or TIF, is a strategic tool used by local governments to encourage the development of underdeveloped or declining areas. It's like giving a neighborhood a financial "facelift" to spark new life and growth. Here is a breakdown of how TIF funding is used to revitalize community areas within Chicago.

STEPS TO TRANSFORMATION:

1. **Vision for Improvement:** Imagine a neighborhood with untapped development potential. Local authorities can establish a TIF district within the area's geographic boundaries, setting the stage for economic transformation.
2. **Locking in the Present:** Once a TIF district has been established by the State of Illinois, the assessed value of the properties within the district are frozen at their current level.
3. **Reaping the Rewards:** As the neighborhood improves and property values go up, so does the amount of property tax collected. However, instead of this extra tax revenue going to the usual public funds, it gets funneled back into the TIF district to pay for new projects within the district.

IMPORTANCE OF TIFS:

1. **Revitalization:** It's a powerful tool for economic development; to transform historically underdeveloped communities into vibrant commercial corridors.
2. **Infrastructure Boosts:** TIFs fund public infrastructure projects that might not be feasible otherwise, due to budget constraints.
3. **Economic Growth:** By attracting new investments into underutilized and undeveloped areas, TIFs fuel economic vitality, creating jobs and enhancing community life.
4. **Self-Financing:** TIFs are a way for projects to essentially "pay for themselves" over time through the increased tax revenue generated by the improvements.

HOW TO READ THIS REPORT

REPORT DATE: The information within this report reflects TIF project projections as of December 31, 2025.

OVERVIEW: Each TIF outlined in this projection report includes overview information at the top, such as the name of the TIF District, the date it was established, the date it will expire, and which wards are included within its boundaries (by percentage).

COLUMNS:

- **Fund and Project Balances:** Funds carried over from previous years that were allocated to projects but have not been spent.
- **Timeline:** These columns show (from left to right) the projected spending activity within the TIF boundaries over the next 10 years.
- **Through End Date:** Provides cumulative costs projected beyond the next 10 years through the anticipated expiration of the TIF.
- **Row Totals:** Provides the total cumulative projected spending activity through the anticipated expiration of the TIF.

ROW SECTIONS:

- **Fund Balance:** Fund Balance typically only contains two rows, one identifying the previous year's fund balance and one identifying the previous year's surplus. Surplus is the process of taking a portion of the TIFs unallocated balance and returning it to the taxing bodies it would normally have been allocated to if the TIF were not in existence.
- **Revenue:** Revenue typically contains two rows—property tax revenue and property tax collection variance. The variance is a mechanism that holds back some revenue to account for property tax disputes and non-payments.
- **Transfers:** When two TIFs are geographically touching each other, they can transfer funds between each other in order to fund infrastructure projects. This section outlines any transfers into or from the TIF to neighboring TIFs.
- **Current Obligations:** These are the individual projects approved by the TIF Investment Committee (TIC). The purpose of the TIC is to review requests for TIF funds to coordinate and align its use with the goals of the administration, alderpersons, and community. TIC review is required for all TIF-funded projects before they advance to legislation or procurement. TIC ensures that projects are legally eligible, financially viable, and warranted. Project costs are often spread across multiple years and forecasted based on when the costs for the project are expected to occur.
- **Proposed Projects:** These are projects that have not yet been approved by the TIC but are projects that internal staff have identified as likely to come before the committee in the near future. Projects in this section are included typically to get a better idea of the financial health of a TIF, should the projects be approved.
- **Unallocated Funds:** This is the amount left over after taking into account the funds carried over from the fund balance, the revenue anticipated to be generated within the TIF District, and the amounts set aside for current obligations and proposed projects. The Unallocated Fund amount reflects the anticipated funding that will remain in the TIF District on December 31st of the year in question.
